📍 Indiranagar, Bangalore  
Karnataka, India

## SKILLS

### Languages :

- Javascript
- Typescript
- GraphQL
- Python
- Java
- SQL
- CSS
- HTML

### Library & Frameworks :

- Node Js - ES6
- React Js
- Express Js
- Nest Js
- Django
- Redux
- FastAPI
- StoryBook
- Tailwind
- MaterialUI

### Tools & Databases :

- MySql
- MongoDB
- PostgreSql
- Redis
- KAFKA
- Docker
- AWS
- CI
- SonarQube

# Vishal Soni

## Software Engineer

## PROFILE

- Nearly **6 years** of experience in **software development**, specializing in **back-end** and **full stack development** across various industries.
- **Critical-thinker** with expertise in future **product planning**, developing each element of the server side and writing clean & scalable codes.
- Familiar with **working with development teams and product managers** to ideate software solutions and **system design** for client-side and server-side architecture.
- Proficient in leveraging a diverse technical skills encompassing **JavaScript, Node.js, React.js, Java, Python** and **micro-services** technologies to develop innovative solutions and drive project success through efficient **coding practices** and strategic **problem-solving** approaches.

## WORK EXPERIENCE

### ACL Digital, Bangalore Sr. Software Engineer

05/2024 - 05/2026

- Designed and implemented a microservices-based architecture using Node.js (TypeScript), Redis (caching & queuing), and PostgreSQL, improving system performance by up to 70%.
- Developed and maintained three microservices (REST APIs and WebSocket service) to enable scalable, real-time applications.
- Built low-latency real-time systems using WebSockets for event-driven communication.
- Optimized API performance and reduced database load via caching strategies, query tuning, and efficient schema design.
- Collaborated directly with clients to gather requirements and deliver scalable technical solutions.
- Developed a Llama3-based RAG (Retrieval-Augmented Generation) application using Ollama, enabling intelligent querying over unstructured data sources.
- Built end-to-end document ingestion pipelines supporting PDFs (OCR-enabled), Excel, and Word documents.
- Designed modular pipelines with LangChain (including langchain-chroma, langchain\_huggingface) for efficient document chunking, embedding, and retrieval.
- Optimized API response times and reduced database load through efficient caching strategies and optimized queries.
- Ensured high scalability by designing a system capable of handling a growing user base and high-traffic events.
- Established a Query Engine backend using FastAPI, including PostgreSQL schema design, connection management, and migration scripts.
- Implemented custom logging, standardized API responses, and clean architecture practices to improve maintainability and team productivity.
- Developed RESTful APIs for CRUD operations with a focus on scalability and code quality.

### 91 Social, Bangalore Resolve AI - Client Sr. Software Engineer

12/2023 - 4/2024

- Involved in version upgrade of a smart online ticketing system using Typescript within a monorepo architecture.
- Led the implementation of complex scalable features.
- Integrated AI functionalities for advanced ticket management in collaboration with crossfunctional teams.
- Launched new features enhancing system performance.
- Optimized back-end performance through database tuning, caching strategies, and asynchronous processing.

## CORE COMPETENCIES

- Agile & Scrum Methodologies
- Full-Stack Development (MERN Stack)
- Frontend & Backend Development
- Web Application Development
- Software Development Lifecycle (SDLC)
- Unit & Integration Testing
- Technical Documentation

## EDUCATION

**B.Tech in Computer Science**  
**Jaypee Institute Of Information Technology, Noida - 2017**

## CERTIFICATIONS

- Modern React with Redux.
- The MERN Full Stack Guide, React Node Mongo & Express Course.
- Coding BootCamp - AttainU MERN Stack Development

## HOBBIES

- Skilled chess player with multiple tournament victories, emphasizing **strategic thinking** and **analytical abilities**.
- Enthusiast of **strategy-based** games and competitions, adept at critical thinking, reading situations, and making informed decisions under pressure.

## PERSONAL INFO

- Date of Birth: 18th July 1995
- Languages Known: English & Hindi

**LanceSoft, Bangalore**  
**Lentra AI - Client**  
**MERN Stack Developer**

4/2023 - 11/2023

- Architected a SaaS banking service management platform using viteJs and nodeJs.
- Enhanced application responsiveness by professionally managing application state using Redux Toolkit and Thunk middleware.
- Collaborated with developers to define and implement innovative solutions.
- Designed and implemented RESTful APIs for seamless integration between front-end and backend systems.

**FlipTree**  
**Java Developer**

02/2022 - 06/2022

- Proficiently coded software changes and modifications using Node.js to comply with design specifications.
- Implemented a robust caching strategy resulting in a reduction in database query response time, enhancing overall application performance and user experience.

**PrepLeaf, Delhi**  
**Software Developer**

10/2019 - 09/2021

- Created visually appealing components and essential APIs using Node.js.
- Collaborated on the UI design of the Prep-seed App using the MERN Stack.
- Contributed to the seamless user experience through efficient app development

## PROJECTS UNDERTAKEN

**(QualApps) Peeps App :**

Designed and developed a real-time disaster response system using Node.js (TypeScript), Redis, WebSockets, and PostgreSQL in a microservices architecture with three services (two API and one socket service), ensuring instant updates via caching and queuing. Singlehandedly built and deployed the entire backend, handled frontend enhancements in React, created Swagger docs & README, and collaborated with DevOps for cloud deployment, improving system efficiency by 95% over the legacy version.

**(ResolveAI) Lakers Bay :**

Helped in version upgrade for Lakers Bay, an online ticketing system, built with TypeScript in a monorepo architecture. Spearheaded feature implementation that ensures robustness and scalability. Employed Redis cache and Kafka for efficient data handling and real-time messaging.

**(LentraAI) Cadenz Profile :**

Architected Cadenz Profile, a SaaS banking service management platform powered by Node.js, Express.js, MongoDB, and Redis. Integrated Kafka for real-time data processing and messaging across microservices. Implemented Storybook for comprehensive documentation, enhancing codebase understanding. Established a microservices architecture for scalability and modularity. Participated in the optimization of backend performance and reliability, ensuring scalability as the user base expands.

**(FlipTree) Lumi-Matrimony:**

Contributed to Lumi Matrimony, a matrimonial website developed using Node.js. Employed Redis cache for optimizing website performance. Addressed issues to ensure seamless matchmaking experiences.

**(PrepLeaf) PrepLeaf :**

PrepLeaf, developed with Node.js and React, trains students in data science and other courses, connecting them with job opportunities. It offers interactive courses, practical exercises, and real-world projects for a comprehensive learning experience.
